Jackie,

Rick will be up in New York May 13 - 15 and can take the train down to meet with your group. Could you work within that time frame to propose some possible dates and times? I'm pretty flexible.

Walt

Hi Walt. We are still in the process of evaluating the PEER request. You may still come in if you wish. We obviously cannot discuss our internal evaluation with any external stakeholders, but you and Rick may come in and voice your thoughts.

It would be best to give me several dates for a meeting. We have started furloughs, and it could be difficult to schedule a meeting with all of the relevant people.

Jackie McQueen

Jackie,

Could you please let me know where EPA is in evaluating the Data Quality Act request submitted by PEER? I sent a note to Rick Doyle today to give me an idea when he plans to come to Washington DC and some dates he would like to meet with you and others at EPA.

Walt

Hi Walt. Hope you are doing well. Yes, I have the Request for Correction

submitted by PEER, and my office will work with our lab to respond. We can certainly set up a meeting later in the month. Let me think about who should attend from EPA. In the meantime, you can provide me with a few dates when you and your group will want to meet, and a list of people you want to bring.

Thanks.

Jackie

Hi Jackie,

I hope you are doing well. Looking at the data of our last email communication, it has been a little while since we spoke with each other.

I'm not sure whether or not you are the appropriate person on this issue, but you may know that PEER has initiated a Data Quality Act Petition with both CPSC and EPA challenging the use of your data to reach certain conclusions regarding the use of crumb rubber in artificial turf.

The Synthetic Turf Council would like to meet with appropriate EPA staff later this month to discuss the implications of this Petition and how the industry could provide additional information to support EPA's findings.

If you are not the appropriate person to handle this request, please let me know who I should contact.

Thanks for your help.

Hi, Walt.

You might want to consider requesting another meeting with EPA (with Michael's group) to summarize what you've already sent in, and discuss any new work you want the group to know about.

Just a thought.

Jackie

Walt

EPA will be hosting a government-only meeting, probably sometime in June, to compare and discuss monitoring and other research results obtained at the federal, state and city level. Details about the meeting have yet to be finalized.

We would appreciate any data, research, information or publications related to tire crumb or synthetic turf that you or others have that you would like us to be aware of, to help inform the Agency.

Thank you for your continued interest.

Subject: FW: Stakeholders Meeting on Crumb Rubber

Michael,

I represent the Synthetic Turf Council and have been working with Jackie McQueen on the crumb rubber issue. When the EPA report was released she indicated that EPA would hold a stakeholders meeting this Spring to bring together all interested parties to discuss the impact of crumb rubber on the health and safety of consumers. She told me your office was involved with organizing the meeting.

Could you please let me know the details of the meeting and how the Synthetic Turf Council could help with this effort.
